Accountable: Sairam Sivakumar, Founder, Broadcastwell.

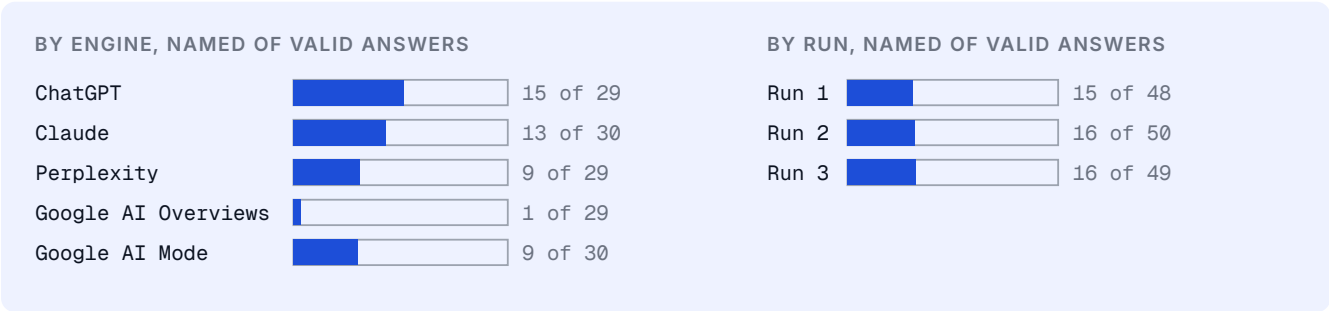

Kalvenor Systems is a fictional company. Its competitors, every source domain (.example) and every answer in this file are sample data from the public sample at [app.broadcastwell.com/sample](https://app.broadcastwell.com/sample): the ten shortlist questions of that sample across its three scheduled runs. Nothing here describes a real vendor.

# Verdict

Kalvenor Systems was named in 47 of 147 answers to the ten buyer questions.

- 1. **Who takes your place.** Northvale FSM was named in 74 of the 100 answers that left Kalvenor Systems out; Asterforge in 30, Trakwell in 27.
- 2. **Where you lose.** Named 0 of 15 on q5, q10. Strongest engine ChatGPT (15 of 30), weakest Google AI Overviews (1 of 30). Run to run: 15 of 48, 16 of 50, 16 of 49, spread 1.
- 3. **What moves it.** Three fixes with an owner and a done check each. The re-measure signal is every run above today's highest run, 16 of 50.

Single-turn, logged-out answers, US English, captured 2026-07-08 to 2026-07-12. AI answers vary by run, date and account, so each question ran three times and the spread is reported. This is an observed baseline, not a ranking and not a statement about product quality.

## Question by question

| #   | QUESTION                                                                                    | NAMED   | ENGINES THAT NAMED YOU                           | MOST NAMED ON THIS QUESTION                        |
|-----|---------------------------------------------------------------------------------------------|---------|--------------------------------------------------|----------------------------------------------------|
| q1  | What is field service management software?                                                  | 5 of 15 | ChatGPT, Claude, Google AI Overviews, Perplexity | Northvale FSM (12); Trakwell (7); Orbit Field (6)  |
| q2  | Which software helps a company schedule and dispatch field technicians?                     | 5 of 14 | ChatGPT, Claude, Google AI Mode, Perplexity      | Northvale FSM (8); Asterforge (8); Orbit Field (8) |
| q3  | What are the strongest field service management platforms for a mid sized service business? | 8 of 14 | ChatGPT, Claude, Google AI Mode, Perplexity      | Northvale FSM (11); Cindermark (9); Trakwell (7)   |
| q4  | What features should field service management software include?                             | 5 of 15 | ChatGPT, Claude, Google AI Mode                  | Northvale FSM (13); Orbit Field (7); Trakwell (5)  |
| q5  | How does field service management software differ from general work order software?         | 0 of 15 | none                                             | Northvale FSM (11); Asterforge (9); Cindermark (9) |
| q6  | Which field service platforms handle recurring maintenance contracts?                       | 5 of 15 | ChatGPT, Claude, Google AI Mode, Perplexity      | Northvale FSM (12); Asterforge (8); Trakwell (6)   |
| q7  | What software tracks technician time and the parts used on a job?                           | 8 of 15 | ChatGPT, Claude, Google AI Mode, Perplexity      | Northvale FSM (14); Trakwell (4)                   |
| q8  | Which field service management systems keep working offline in the field?                   | 3 of 14 | ChatGPT, Claude, Perplexity                      | Northvale FSM (11); Verano FSM (6); Asterforge (5) |
| q9  | What software is used to manage a mobile service workforce?                                 | 8 of 15 | ChatGPT, Claude, Google AI Mode, Perplexity      | Northvale FSM (9); Cindermark (9); Trakwell (7)    |
| q10 | Which platforms combine scheduling, invoicing and inventory for service teams?              | 0 of 15 | none                                             | Northvale FSM (9); Orbit Field (8); Trakwell (6)   |

Lost questions, named 0 of 15: q5 How does field service management software differ from general work order software?; q10 Which platforms combine scheduling, invoicing and inventory for service teams?.

## Engine by engine

| ENGINE              | NAMED (OF 30) | RATE  | 95% INTERVAL   |
|---------------------|---------------|-------|----------------|
| ChatGPT             | 15 of 29      | 51.7% | 34.4% to 68.6% |
| Claude              | 13 of 30      | 43.3% | 27.4% to 60.8% |
| Perplexity          | 9 of 29       | 31.0% | 17.3% to 49.2% |
| Google AI Overviews | 1 of 29       | 3.4%  | 0.6% to 17.2%  |
| Google AI Mode      | 9 of 30       | 30.0% | 16.7% to 47.9% |

Run to run: run 1 15 of 48, run 2 16 of 50, run 3 16 of 49. Spread 1.

# Scope, exclusions and crawler access

## Scope

Ten buyer questions in one category, put to ChatGPT, Claude, Perplexity, Google AI Overviews and Google AI Mode three times each between the capture dates on the cover. Every answer was stored in full with its cited URLs before scoring. Named means an exact, case-insensitive match of the company name or an alias with no letter, digit or underscore on either side; a plain-word name also needs a qualifier within five words in the same sentence unless the answer cites the company's own domain. Cited means named and a cited URL on the company's own domain. Excluded answers leave the base and are never counted as "not named". Every rate carries its numerator, its base and a 95% Wilson interval.

Kalvenor Systems is a fictional company. Its competitors, every source domain (.example) and every answer in this file are sample data from the public sample at [app.broadcastwell.com/sample](https://app.broadcastwell.com/sample): the ten shortlist questions of that sample across its three scheduled runs. Nothing here describes a real vendor.

## Exclusions

- q2 · Google AI Overviews · run 3 NoOverview
- q3 · Perplexity · run 1 Timeout
- q8 · ChatGPT · run 1 Timeout

## Crawler access

Checked 13 July 2026 (sample): <https://kalvenor.example/robots.txt>. Present. It names GPTBot and Google-Extended and blocks Google-Extended only. GPTBot, OAI-SearchBot, ChatGPT-User, ClaudeBot, Claude-User, PerplexityBot and Perplexity-User are not blocked. Sitemap present with 184 URLs. llms.txt absent (404). Not tested: bot filters or firewall rules that answer crawler user agents differently, and homepage status under each crawler user agent. Access is not indexing.

## Receipts file

receipts.csv: 150 rows, every answer in full with engine, run, capture time, cited URLs and the scoring. SHA-256 1194b99f2d6654e85a87662f8f2a7ca1c916b9bc74e0724bbec23c10de5151ed. The appendix in this file shows each answer's first 40 words; the CSV carries the whole answer.

# Who is named instead

In the 100 answers that left Kalvenor Systems out, these are the vendors the engines named. Counts are over all 147 valid answers and over the 100 that left you out; "top cited domain" is the domain cited most often in the answers that name that vendor.

| VENDOR        | NAMED, ALL ANSWERS | 95% INTERVAL   | IN ANSWERS WITHOUT YOU | QUESTIONS NAMED | TOP CITED DOMAIN              |
|---------------|--------------------|----------------|------------------------|-----------------|-------------------------------|
| Northvale FSM | 110 of 147         | 67.2% to 81.2% | 74 of 100              | 10 of 10        | trakwell.example (29)         |
| Asterforge    | 41 of 147          | 21.3% to 35.6% | 30 of 100              | 6 of 10         | asterforge.example (11)       |
| Trakwell      | 46 of 147          | 24.4% to 39.2% | 27 of 100              | 8 of 10         | asterforge.example (15)       |
| Orbit Field   | 34 of 147          | 17.0% to 30.6% | 25 of 100              | 5 of 10         | servicetechforum.example (10) |
| Cindermark    | 35 of 147          | 17.6% to 31.3% | 24 of 100              | 4 of 10         | asterforge.example (8)        |
| Verano FSM    | 24 of 147          | 11.2% to 23.1% | 22 of 100              | 4 of 10         | hvacoperations.example (8)    |

Kalvenor Systems itself: 47 of 147, 25.0% to 39.9%, 8 of 10 questions. Vendors on the tracked list that no answer named are not shown.

# The sources those answers cite

Domains cited in the answers, ranked by how many of the 147 valid answers cite them, with the vendors those answers name. 13 domains were cited in all; the top 13 are shown here and every domain is in sources.csv.

| DOMAIN                     | ANSWERS<br>CITING IT | IN ANSWERS<br>WITHOUT YOU | NAMING<br>YOU | VENDORS THOSE ANSWERS NAME                           |
|----------------------------|----------------------|---------------------------|---------------|------------------------------------------------------|

| northvalefsm.example       | 24 of 147            | 17 of 100                 | 7             | Northvale FSM (16), Asterforge (9), Cindermark (5)   |
| orbitfield.example         | 23 of 147            | 13 of 100                 | 10            | Northvale FSM (16), Orbit Field (8), Asterforge (5)  |
| veranofsm.example          | 21 of 147            | 12 of 100                 | 9             | Northvale FSM (18), Trakwell (7), Orbit Field (4)    |
| softwarecompare.example    | 20 of 147            | 12 of 100                 | 8             | Northvale FSM (17), Trakwell (7), Orbit Field (5)    |
| fieldservicereview.example | 19 of 147            | 12 of 100                 | 7             | Northvale FSM (15), Asterforge (7), Cindermark (5)   |
| servicebuyersguide.example | 18 of 147            | 13 of 100                 | 5             | Northvale FSM (16), Cindermark (7), Asterforge (5)   |
| kalvenor.example           | 17 of 147            | 0 of 100                  | 17            | Northvale FSM (11), Trakwell (8), Asterforge (6)     |
| operationsweekly.example   | 12 of 147            | 6 of 100                  | 6             | Northvale FSM (10), Asterforge (3), Orbit Field (3)  |

Kalvenor Systems's own domain was cited in kalvenor.example (17) answers. Answers that cited it without naming Kalvenor Systems: 0.

## Three fixes

Three changes, ranked by the evidence above. Each names a role on your team, a done check anyone can run, and the number the re-measure watches. None of them is a promise about what the engines will do.

### 1 Publish one comparison page that answers the two lost questions with product evidence

|            |                                                                                                                                                                                                                                                                                                                                |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OWNER      | Content lead                                                                                                                                                                                                                                                                                                                   |
| EVIDENCE   | q5 (how the category differs from general work order software) and q10 (scheduling, invoicing and inventory in one platform) named Kalvenor 0 of 15 each. Northvale FSM was named 11 and 9 times on those questions; the answers cite trakwell.example (30) and hvacoperations.example (22) most when they leave Kalvenor out. |
| DONE CHECK | A page at a stable URL answers both questions in its first 100 words with dated product facts, and the two most-cited third-party pages link to it or list Kalvenor.                                                                                                                                                           |
| RE-MEASURE | Named count on q5 and q10 across all five engines at the re-measure.                                                                                                                                                                                                                                                           |

### 2 Get Kalvenor listed on the pages Google AI Overviews cites when it leaves Kalvenor out

|            |                                                                                                                                                                                                                         |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OWNER      | Product marketing                                                                                                                                                                                                       |
| EVIDENCE   | Google AI Overviews named Kalvenor in 1 of 29 valid answers, against 15 of 29 on ChatGPT and 13 of 30 on Claude. Its answers without Kalvenor cite trakwell.example, cindermark.example and servicebuyersguide.example. |
| DONE CHECK | servicebuyersguide.example and hvacoperations.example list Kalvenor in their field service software pages with the pricing model and offline capability stated, on a dated check.                                       |
| RE-MEASURE | Google AI Overviews named count on all ten questions at the re-measure.                                                                                                                                                 |

### 3 Add recurring maintenance contract and offline detail to the dispatch page

|            |                                                                                                                                                                                                                                                                                     |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OWNER      | Product marketing                                                                                                                                                                                                                                                                   |
| EVIDENCE   | q6 (recurring maintenance contracts) named Kalvenor 5 of 15 and q8 (offline in the field) 3 of 15; kalvenor.example is cited in 17 answers, so the engines read the site when it surfaces. robots.txt blocks Google-Extended, which does not affect the five engines measured here. |
| DONE CHECK | kalvenor.example/platform/dispatch states recurring contract handling and offline behavior in dated, checkable terms, and is linked from the main navigation.                                                                                                                       |
| RE-MEASURE | Named count on q6 and q8 at the re-measure.                                                                                                                                                                                                                                         |

# CMO summary

THE NUMBER

47 of 147

32.0%, 25.0% to 39.9%. 8 of 10 questions.

WHO TAKES YOUR PLACE

Northvale FSM (74 of 100), Asterforge (30 of 100), Trakwell (27 of 100).

WHERE ENGINES DIFFER

Strongest ChatGPT (15 of 30), weakest Google AI Overviews (1 of 30).

WHERE THE ANSWERS COME FROM

trakwell.example (30), hvacoperations.example (22), cindermark.example (19), cited in the 100 answers that left you out.

THE THREE FIXES

1. Publish one comparison page that answers the two lost questions with product evidence.  
Owner: Content lead. Done when: A page at a stable URL answers both questions in its first 100 words with dated product facts, and the two most-cited third-party pages link to it or list Kalvenor.
2. Get Kalvenor listed on the pages Google AI Overviews cites when it leaves Kalvenor out.  
Owner: Product marketing. Done when: servicebuyersguide.example and hvacoperations.example list Kalvenor in their field service software pages with the pricing model and offline capability stated, on a dated check.
3. Add recurring maintenance contract and offline detail to the dispatch page. Owner: Product marketing. Done when: kalvenor.example/platform/dispatch states recurring contract handling and offline behavior in dated, checkable terms, and is linked from the main navigation.

WHAT SUCCESS LOOKS LIKE AT DAY 30

The re-measure on the same ten questions names you more often in every run than the highest of today's three runs (16 of 50). A change inside that spread is run noise.

RECEIPTS

150 answers in receipts.csv. Method v1.1.

# Finance memo

To: Kalvenor Systems, finance copy. From: Sairam Sivakumar, Founder, Broadcastwell. Order SAMPLE-KALVENOR-FICTIONAL.

|                              |                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHAT WAS BOUGHT              | Category Audit, \$490 once, paid 2026-07-06 (sample).                                                                                                                                                                                                                                                                                                        |
| WHAT IT COST YOU             | \$490. No subscription, no renewal, no further charge.                                                                                                                                                                                                                                                                                                       |
| REFUND TERMS                 | Refundable in full, no questions asked, if requested within 30 days of delivery (until 13 August 2026).                                                                                                                                                                                                                                                      |
| WHAT WAS MEASURED            | 10 buyer questions, 5 engines, 3 runs, 150 planned answers, 147 valid, captured 2026-07-08 to 2026-07-12. Method v1.1.                                                                                                                                                                                                                                       |
| WHAT THE EVIDENCE SHOWS      | In 100 of 147 answers to these ten buyer questions, the engines gave a shortlist that did not include Kalvenor Systems. Northvale FSM was on 74 of those shortlists. 2 of the 10 questions never named Kalvenor Systems in any run. That is the observed cost of leaving things as they are. No revenue figure is attached to it, because none was measured. |
| CREDIT                       | The full \$490 credits against the AI Visibility Diagnostic (\$990) if bought by 13 August 2026.                                                                                                                                                                                                                                                             |
| OPTIONAL NEXT STEP           | A \$190 re-measure of the same ten questions between 13 August 2026 and 12 September 2026, by private link.                                                                                                                                                                                                                                                  |
| WHAT SUCCESS MEANS AT DAY 30 | The three fixes are marked done (each has a done check), and a re-measure names you more often in every run than the highest of today's runs (16 of 50). Not a revenue promise.                                                                                                                                                                              |

# Receipts

Every answer, in the order question, engine, run. Each entry shows the engine, the run, the capture time, whether Kalvenor Systems was named, the first 40 words of the answer and the URLs the answer cited (shown without query strings; the CSV carries each URL in full). Excluded answers are marked with their reason.

q1 What is field service management software?

5 of 15 named

|                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

# Credit note

Credit note for order SAMPLE-KALVENOR-FICTIONAL. Kalvenor Systems. Delivered 14 July 2026.

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| THE CREDIT     | Illustrative credit for a paid Audit: the \$490 fee credits in full against the AI Visibility Diagnostic (\$990 once: 35 questions, five engines, 525 scheduled answers) if the Diagnostic is bought within 30 days of this delivery, until 13 August 2026. The credit is applied once and is not cash.                                                                                                                                                                                                      |
| THE DIAGNOSTIC | This fictional sample or internal rehearsal does not reopen the Diagnostic. Reopening requires an actual paid Audit delivery and owner confirmation. It is bought at <a href="https://broadcastwell.com/buy/diagnostic">broadcastwell.com/buy/diagnostic</a> ; the credit is applied at checkout or by reply to your order email.                                                                                                                                                                            |
| THE RE-MEASURE | The same ten questions, the same five engines, three runs, the same method, rerun 30 to 60 days after delivery for \$190: open from 13 August 2026 to 12 September 2026. One per delivered order, by private link on request; it is never sold on a public page. A change clears the observed baseline run range only when the lowest re-measure run is above the highest baseline run (16 of 50); otherwise the observed run ranges overlap. This rule is descriptive, not a statistical significance test. |
| REFUND         | This Audit is refundable in full, no questions asked, if requested within 30 days of delivery, until 13 August 2026.                                                                                                                                                                                                                                                                                                                                                                                         |
